(2) 一个制造商对同一品牌同一规格的货物在一年内向同一客户所供应的货物总量不得超过该客户年度需求量的30%。

Figure 1: Schematic representation of the experimental design. The figure shows a sequence of events: a fixation cross, a stimulus (a word), and a response (a button press). The stimulus is presented for 1000 ms, and the response is recorded. The response is then used to determine the next stimulus. The sequence is repeated for multiple trials.

Sequence logo for the 100bp region around the start of the gene. The y-axis represents information content in bits, ranging from 0 to 1.5. The x-axis shows positions from -100 to 100. The sequence is shown in a color-coded font: A (green), C (blue), G (red), T (orange). The logo shows a strong conservation of the start codon (ATG) at position 1 and the stop codon (TAA) at position 100.
